Dear Peter,

How are you doing recently? Having learned that you are interested in the garbage classification activity held in our school, I'm writing to introduce it to you.

Recently, Garbage Classification has become one of the most popular topics in our country. In order to enhance the consciousness of environmental protection of us students, our school organized the activity through speech contest, bulletin and blackboard poster competition. Through the activity, we have learned how to sort out our garbage before dumping it, which not only beautifies the campus but economizes resources as well.

By joint efforts, we will lead a better life.

Yours,

Li Hua
