

东城区 2020—2021 学年度第一学期期末统一检测

高三英语

2021.1

本试卷共 11 页,共 100 分。考试时长 90 分钟。考生务必将答案答在答题卡上,在试卷上作答无效。考试结束后,将本试卷和答题卡一并交回。

第一部分:知识运用(共两节,30 分)

第一节 完形填空(共 10 小题;每小题 1.5 分,共 15 分)

阅读下面短文,掌握其大意,从每题所给的 A、B、C、D 四个选项中,选出最佳选项,并在答题卡上将该项涂黑。

A school bus driver returned to college to become a high school history teacher, thanks to some 1 students.

Clayton Ward is a history lover, and as such, 2 the time he'd spend chatting with students about their history classes as he 3 them to and from school.

"After several of these discussions, some of the students would tell me they wanted me to be their 4," he said. "That small mention from those kids... it 5 me and gave me the motivation to complete a goal I had started years ago."

6, Ward went to college after his high school graduation; but after a year, he had to leave and soon started driving buses. But he still valued 7, and talking with the students on the bus route renewed his sense of passion for expanding and teaching young minds.

Ward enrolled (注册) at a community college in May 2019, and 8 to take his classes full time while also still driving his bus.

"It wasn't always 9. I would drive my route in the morning and afternoon, take classes in between shifts and take night classes," he said. "I would think of those students and all the years I wanted to make this happen, and it helped me focus my energy."

"You wouldn't think that kids can do something like that, to give me the 10 and ambition to go back to school," Ward said. "It's kind of crazy that such a small thing can make such an impact on your life."

第二节 语法填空(共 10 小题;每小题 1.5 分,共 15 分)

阅读下列短文,根据短文内容填空。在未给提示词的空白处仅填写 1 个适当的单词,在给出提示词的空白处用括号内所给词的正确形式填空。

A

Adolph Kiefer, a famous swimmer, 11 (die) at the age of 98 in 2017. Kiefer was America's 12 (old) living Olympic champion. He was the first in the world to break the one-minute mark in the 100-meter backstroke (仰泳) when he was a 16-year-old student. One year later, Kiefer won the gold medal in the 100-meter backstroke competition at the Olympic Games, 13 (set) a record that would stand for 20 years.

B

About 5,000 years ago, a strange circle of blue stones were set up in Britain. The structure has 80 stones in all and each stone 14 (weigh) about three tons. No one is sure 15 built the structure. One of the most popular beliefs is that the Celts built it. Some even think creatures from another planet who visited Earth left it behind just 16 (let) us know they were here.

C

Have you ever attended a *Cinco de Mayo* festival? If you have not, you do not know what you are missing. 17 Spanish, the words *cinco de mayo* mean *fifth of May*. It is a day for the 18 (celebrate) of the fighting spirit of Mexican people. The festival 19 (hold) both in Mexico and in parts of the United States, especially the Southwest, 20 there is a larger Hispanic population.

第二部分：阅读理解(共两节，38分)

第一节 (共14小题；每小题2分，共28分)

阅读下列短文，从每题所给的A、B、C、D四个选项中，选出最佳选项，并在答题卡上将该项涂黑。

A

To increase your chances of landing an assignment for a travel guidebook, you need to find out what the publishers are looking for. Here are links to their submission guidelines with a few special requirements and tips.

Fonor's

Fonor's is a publishing company of both travel guidebooks and online content covering thousands of destinations worldwide. Visit *Fonors.com/about-us*, and near the bottom of the page you'll find "Write for Us" with information for submitting articles. Do remember to attach a copy of one of your other works when contributing.

☆TIP: Fonor's always hires writers who live in the destinations they cover. So, it's good to remember: While you may want to write about a foreign destination, more than likely you're closer to being an expert about the place where you live.

Workman

Workman publishes unique and unexpected travel guides such as *1,000 Places to See Before You Die*, and *The Food Lover's Guide to Paris*. Consider them if you're interested in writing a nontraditional travel guide. You can find their submission guidelines at *workman.com/work-with-us*. They require a typical nonfiction book proposal with a suggested table of contents and author information. A chapter of your other books is also required. Send your submissions to *submissions@workman.com*.

☆TIP: If they don't accept your article, you might be lucky enough to get feedback about why.

Lonely Planet

Writers can get in touch with Lonely Planet by visiting their "Become a Contributor" page at *LonelyPlanet.com/contribute*. At that page you'll find a form asking for a résumé (简历) and links to your other writing, but there's also space for more travel-related information such as geographical knowledge and level of fluency in relevant languages.

☆TIP: You'll find they also accept articles for "Travel News". If they say yes, you may get another chance for a bigger job such as a Guidebook.

For more information on publishers, please visit ContributorsDigest.com.

21. This passage is mainly for _____.
- A. guides
B. writers
C. travelers
D. publishers
22. Who may provide advice on how to improve articles?
- A. Foster's
B. Workman.
C. Lonely Planet.
D. Contributor's Digest.
23. What is required by all the companies?
- A. Geographical knowledge.
B. Nontraditional ideas.
C. Overseas experience.
D. Previous writing.

B

Craig Foster, bare-chested, was diving in bitterly cold waters off the southern-most tip of Africa when he saw her—an octopus hiding under a coat of shells and stones.

Deeply attracted, he began following this incredibly shy creature. He kept coming back every day to the same place where he first met her, trying to stay very still in her presence. For weeks she refused him: hiding in her home, or pushing her liquid body into the nearest crack to escape. And then, after Foster's dogged persistence for 26 days, she reached out and touched him.

In the documentary "My Octopus Teacher", this tender moment moves you in a way you never thought an octopus tentacle (触手) wrapped around a human hand could. The nature documentary won Best Feature at the EarthxFilm Festival 2020.

"If you gain the trust of that animal over a period of months, it will actually ignore you to a certain degree and carry on with its normal life, and allow you to step inside its secret world," Foster says in his documentary.

We see her outsmarting a shark by riding on its back, growing a new tentacle after surviving a shark attack, and finally wasting away after laying her eggs. "The octopus showed me many behaviors that were completely new to science," Foster says.

After years of filming some of the planet's most dangerous animals, Foster was burnt out, depressed, and disconnected. "I was struggling. My only way to heal felt like I needed to be in the ocean, my go-to happy place as a child," he says.

Completely involving himself in the underwater world has calmed his mind. Over the years other animals have reached out to make contact, including dolphins, whales and even sharks. "But nothing has compared to this 'once-in-a-lifetime' bond with the octopus," Foster says.

The octopus changed Foster's life forever. Foster says the octopus taught him that humans are part of the natural world, and not simply visitors. "Your own role and place in the natural world is the most precious gift we humans have received," he says.

24. Foster followed the octopus with _____.
- A. great patience
B. a professional goal
C. scientific curiosity
D. an adventurous spirit
25. According to "My Octopus Teacher", the octopus _____.
- A. enjoyed Foster's attention
B. taught Foster surviving skills
C. placed trust in Foster gradually
D. benefited from Foster's company
26. What did Foster learn from the experience?
- A. The natural world offers many gifts.
B. Humans belong to the natural world.
C. The natural world never fails to impress.
D. Humans should protect the natural world.

C

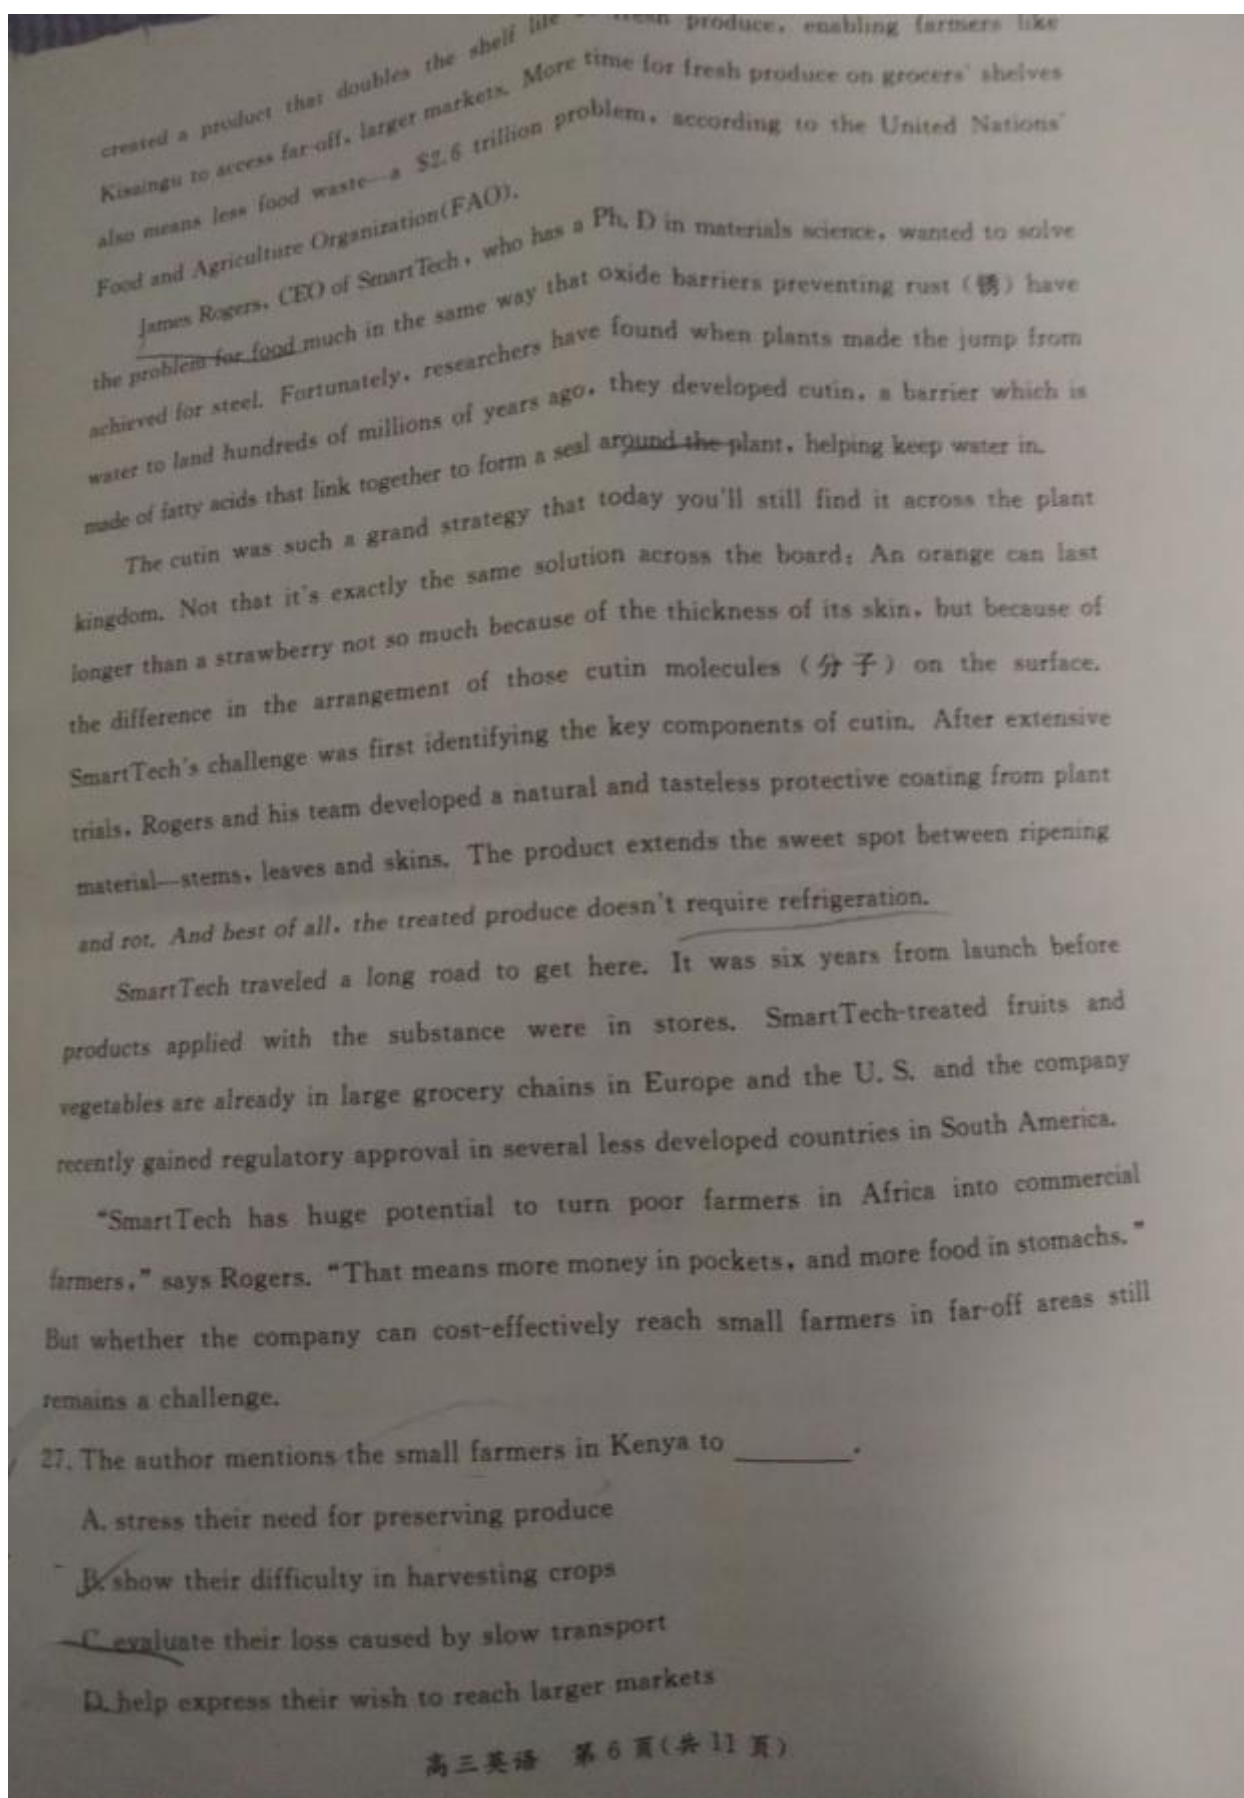

Once small farmers in Masii, a remote village in Kenya, have picked their crops, all they can do is wait until a buyer trucks through. The system works fairly well for beans and corn, but mangoes—the area's other main crop—spoil (腐烂) more quickly. If the trader is late, they rot.

mangoes

Obadiah Kisingu, a farmer in Masii, estimates 40% of the village's mango crop is lost to spoilage. But a simple coating could change that. A company, SmartTech, has

高三英语 第5页(共11页)

27. The author mentions the small farmers in Kenya to _____.

- A. stress their need for preserving produce
- B. show their difficulty in harvesting crops
- C. evaluate their loss caused by slow transport
- D. help express their wish to reach larger markets

高三英语 第6页(共11页)

- ...ust can we learn about SmartTech's product?
- A. It is financially supported by FAO.
 - B. It is intended to replace refrigeration.
 - C. It is designed to thicken produce's skin.
 - D. It is based on plants' own defence system.
29. What does James Rogers expect?
- A. To profit farmers.
 - B. To earn more money.
 - C. To produce more food.
 - D. To expand grocery chains.
30. The main purpose of the passage is to _____.
- A. prove a theory
 - B. promote a product
 - C. introduce a company
 - D. present a technology

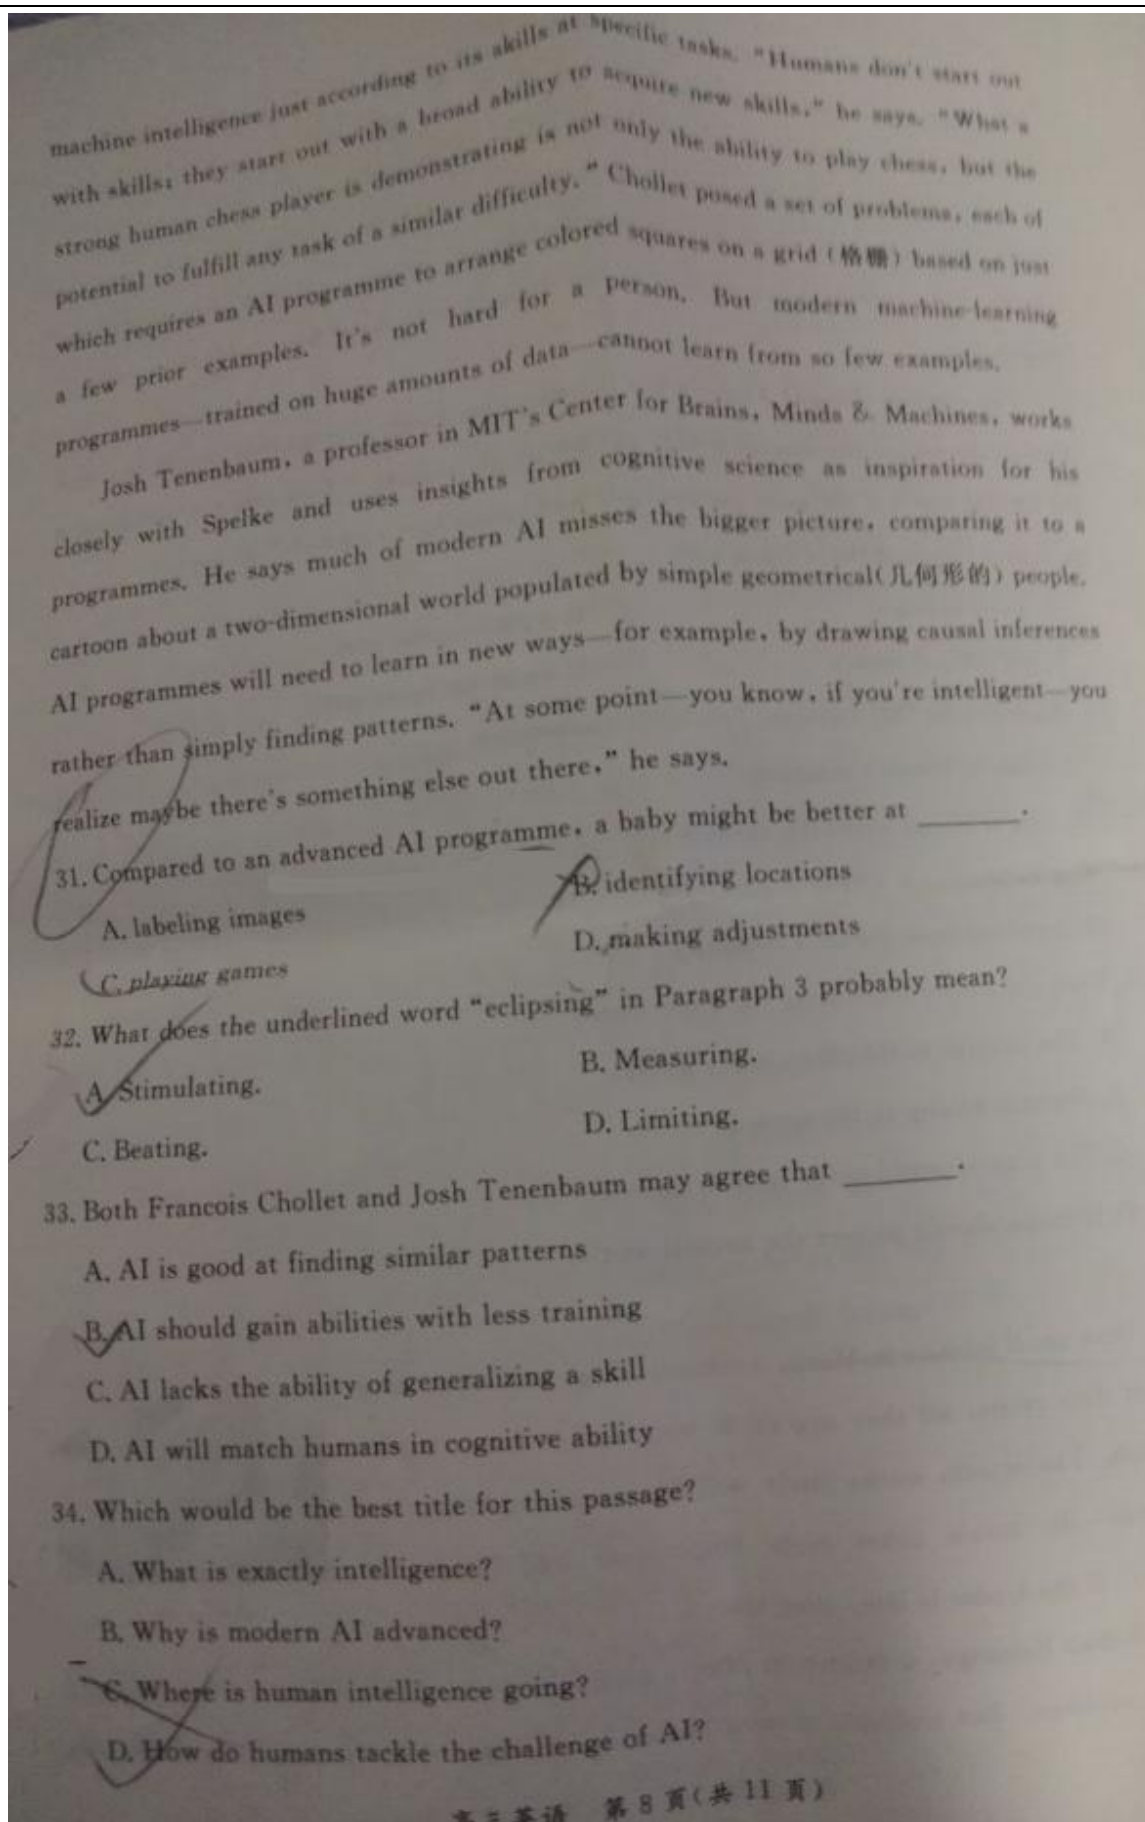

D

Elizabeth Spelke, a cognitive (认知的) psychologist at Harvard, has spent her career testing the world's most complex learning system—the mind of a baby. Babies might seem like no match for artificial intelligence (AI). They are terrible at labeling images, hopeless at mining text, and awful at video games. Then again, babies can do things beyond the reach of any AI. By just a few months old, they've begun to grasp the foundations of language, such as grammar. They've started to understand how to adapt to unfamiliar situations.

Yet even experts like Spelke don't understand precisely how babies—or adults, for that matter—learn. That gap points to a puzzle at the heart of modern artificial intelligence: We're not sure what to aim for.

Consider one of the most impressive examples of AI, Alpha Zero, a programme that plays board games with superhuman skill. After playing thousands of games against itself at a super speed, and learning from winning positions, Alpha Zero independently discovered several famous chess strategies and even invented new ones. It certainly seems like a machine eclipsing human cognitive abilities. But Alpha Zero needs to play millions more games than a person during practice to learn a game. Most importantly, it cannot take what it has learned from the game and apply it to another area.

To some AI experts, that calls for a new approach. In a November research paper, Francois Chollet, a well-known AI engineer, argued that it's misguided to measure

第二节 (共5小题;每小题2分,共10分)

根据短文内容,从短文后的七个选项选出能填入空白处的最佳选项。选项中有两项为多余选项。

Most people admit extreme nervousness at even the thought of giving a speech. 35 Through speaking, we gain the power to share what we are thinking with others.

Actually, not only do most beginning speakers suffer anxiety at the thought of speaking in public, but even powerful speakers like Abraham Lincoln and Franklin D. Roosevelt were nervous before speaking. 36 Some people tremble, sweat, and experience shortness of breath and increased heartbeats. As they go through their speech, they may be so preoccupied with themselves that they lose contact with the audience, jump back and forth from point to point, and on occasion forget what they have planned to say. 37 And they still go on to deliver a strong speech. The secret is not to get rid of all of your feelings but to learn to channel and control your nervousness.

Very few people are so bothered by anxiety that they are unable to proceed with the speech. 38 Why? Because you must be a little more aroused than usual to do your best. A bit of nervousness gets the adrenaline (肾上腺素) flowing—and that brings you to speaking readiness.

Many speakers worry that others will notice how nervous they are—and that makes them even more self-conscious and nervous. A young woman reported that she broke out at home before each speech. 39 She was amazed when other students said to her, "You seem so calm when you speak." 40 Once you realize that your audience does not perceive your nervousness to the degree that you imagine, you will remove one unnecessary source of anxiety.

The more experience you get in speaking, the better you become at coping with nervousness. As time goes on, you will come to find that having a group of people listening to you alone is a very satisfying experience.

- A. The only thing we have to fear is fear itself.
- ~~B. In fact, it would be harmful if you were not nervous.~~
- C. Try getting feedback from your listeners after a speech.
- D. The difference in nervousness among people is a matter of degree.
- E. Yet you must learn to cope with nervousness because speaking is important.
- F. Others, however, may get butterflies in their stomachs and feel weak in the knees.
- ~~G. Perhaps the most important time for coping with nervousness is shortly before a~~

第三部分：书面表达(共两节，20分)

第一节 阅读表达(共4小题，第1、2题各2分，第3题3分，第4题5分，共12分)

阅读下面短文，根据题目要求回答问题。

Fashion's Melt Down

Throwaway culture is trashing the planet—but one young chemical engineer has her own way to turn it over.

Fast fashion has changed the way we dress. We buy more clothes, more often—but we wear them less. Alina Bassi, founder of Kleiderly, wants to give our clothing waste another chance at a useful life.

Bassi has always cared about the threat of climate change, but she actually started her career in the oil industry. After a few years, she landed at bio-bean, a startup that turned waste coffee grounds into products that could be burnt for heat and fuel. After a year, Bassi was keen to branch out—used coffee grounds are not the biggest threat facing the planet. Instead, she poured her efforts into tackling a much bigger global polluter: the fashion industry.

According to the Ellen MacArthur Foundation, we produce 100 billion items of clothing per year, and this is set to double by 2050. But they don't last long enough to offset (抵消) the carbon cost of producing the material, creating the clothes, and then shipping them to customers. "It makes no sense that we have such a high carbon footprint for something so short-lived," Bassi says.

Using the principles of a circular economy, Bassi has developed a low-energy, multi-stage process to turn clothing fibres into an alternative to oil-based plastic. This new plastic can then be used by manufacturers in their existing machines, so that your old T-shirts and jeans will become different products instead of clothes, such as clothing hangers, or even furniture.

Fashion companies have some other ways to reduce fashion waste, from creating clothes designed to last, to recycling the fabric to make more clothing. But "a problem this big needs multiple solutions," Bassi says. "We think about the multiple lives of a product and how we can keep reusing it instead of letting it fall into landfills or incinerators (焚化炉)," she says.

40. Why did Bassi switch her focus to the fashion industry?

41. Please paraphrase the underlined sentence in your own words.

42. Please decide which part is false in the following statement, then underline it and explain why.

- *Kleiderly can change old jackets and trousers into a new material, which can be used to make more clothing.*

43. Please briefly present your own solution(s) to the throwaway problem in daily life.
(about 40 words)

第二节 (20分)

假设你是红星中学高三学生李华。你的英国笔友 Jim 来邮件,询问你如何利用博物馆资源促进学习。请你给 Jim 回一封电子邮件,内容包括:

1. 经历;
2. 感受。

注意:1. 词数 100 左右;
2. 开头和结尾已给出,不计入总词数。

Dear Jim,

Yours,

Li Hua

(请务必将作文写在答题卡指定区域内)
