### 第一节

One possible version:

It's important to protect cultural heritage, because it's an important resource for the study of human civilization and the root of a place.

The best-known cultural heritage site in our city is the Stone Monuments in a temple, the earliest part of which dates back to the Tang Dynasty. The most amazing thing is that after hundreds or even thousands of years, most of them are well preserved and the words on them are still visible. These monuments are our roots and give us a sense of belonging. We should make every effort to protect them and call on more and more people to pay attention to the preservation of the cultural heritage.

### 第二节

One possible version:

However, I wasn't completely sure whether it was worthwhile. "I appreciate your kind efforts, but don't you think your time could be better spent? And 99% of these turtles don't have kind people like you to help them clean off their shells, are your efforts really making an impact?" The lady laughed out loud, then looked up at me and said, "Dear, if this little one could speak, he'd gladly tell you that my care towards him makes a big difference in the world." Her words made me understand one important lesson in life. Every little act of kindness counts.

"Can I help you clean the turtles?" I asked the lady. "Of course, you can," she nodded and said with pleasure. She taught me patiently and told me how to make the turtles clean again. "You should rub the shell of them gently, otherwise you will hurt them," she reminded me. I picked up a little turtle, trying to imitate her and using the sponge brush to clean the shell. With the algae and scum got rid of, the turtle looked relaxed and joyful. The old woman and I smiled at each other.
