第一节 (共15小题; 每小题2分, 满分30分)

阅读下列短文, 从每题所给的A、B、C和D四个选项中, 选出最佳选项。

A

If you are to watch high-quality movies on the go, then the following ones are your ideal options.

The Blind Side

The movie follows the story of Michael Oher, a poor kid from a rough neighborhood who succeeds academically and discovers his talents as a football player after being adopted by the wealthy Tuohy family. As a result of those skills and the love and encouragement of the Tuohys, Oher gets into college and eventually makes it to the National Football League.

Coco

The story features a 12-year-old boy named Miguel who is crazy about music. On the Day of the Dead, he is accidentally transported to the Land of the Dead. There he seeks the help of his great-great-grandfather to return him to his family among the living and to change his family's ban on music. With themes of perseverance, teamwork, and love, the film inspires audiences to appreciate their family and always follow their dreams.

Wonder

Wonder tells a story of a boy named Auggie, who was born with Treacher Collins syndrome (特雷彻·柯林斯综合征); he has gone through 27 surgeries since birth. After years of home-schooling, Auggie is sent to a regular school by his Mom. He faces all types of problems. However, Auggie is a tough-minded and intelligent person, and with love from his family and friends, he finally manages to gain acceptance by most of his schoolmates and other people in the community.

21. Who is talented in sports?

- A. Michael Oher. B. The Tuohys. C. Miguel. D. Auggie.

22. What do we learn about Miguel?

- A. He asks his great-grandfather for help. B. He plans to visit the Land of the Dead.

23. What do the three movies have in common?

- A. They are about three boys' schoolwork. B. They tell inspiring stories full of love.
C. They focus on the life of adopted kids. D. They show the importance of teamwork.

B

Clara Barton, born on December 25, 1821 in Oxford, Massachusetts, has a crucial and long-lasting impact on care giving and disaster relief in America and throughout the world.

As a young child, Barton had great difficulty studying and making friends at school. For most of her early years, she was taught at home. She really began her life of caring for the sick at age 11, when her brother David was seriously injured while helping build a barn (谷仓). She nursed him carefully for two years until he was healed.

Barton began teaching at age 17 and was greatly respected by her students. Twelve years later, she started a free public school for poor children in New Jersey. But within a year, she had to leave after the school board voted to replace her as headmaster with a man.

Barton was working for the Patent Office Washington, D.C. when the Civil War broke out in 1861. The wounded soldiers flooded the streets of Washington, D.C. Then a temporary hospital was created in the uncompleted Capitol Building (国会大厦). She brought them food, clothing and other necessities from her home, and launched a campaign for more relief items from friends and the public. More importantly, she spent hours with the homesick and suffering soldiers, writing letters and offering prayers and comfort. She worked long into the night assisting the surgeons, cooking food for the soldiers and tending the wounded, despite nearby gunfire flying overhead.

Barton made a deep impression on Union army surgeons at Antietam. One surgeon, Dr. James Dunn, said, "In my estimation, General McClellan, with all his great honors, sinks into insignificance beside Barton, a true heroine of the age."

After the war President Lincoln put Barton in charge of locating missing soldiers. When she returned to the United States, she successfully helped start the American Red Cross and became its first president.

Clara Barton died at the age of 91. A monument in her honor stands at Antietam National Battlefield.

24. Why did Barton leave the school where she worked?

- A. She didn't like teaching any more. B. She needed to tend to her brother.
C. A man took her place as headmaster. D. A patent office offered her a position.

25. Which of the following can best describe Barton?
- A. Caring and brave. B. Determined and talkative.
C. Smart and modest. D. Optimistic and humorous.
26. What can be inferred from Dr. James Dunn's words in Paragraph 5?
- A. He thought little of General McClellan.
B. He expressed his admiration for Barton.
C. He showed his worry about the wounded soldiers.
D. He attached significance to his work as a surgeon.
27. Which can be a suitable title for the text?
- A. A Clerk in the Patent Office. B. An Educator of the Times.
C. A Surgeon During the War. D. A Heroine of the Battlefield.

C

A team of researchers at Harvard University and Emory University have created a school of robotic fish. They can swim by recreating the contractions (收缩) of a pumping heart. Researchers say the experiment could advance pacemaker (心脏起搏器) technology and improve the development of artificial hearts for humans.

Researchers built the zebrafish-based fish using paper, gelatin (明胶), plastic fin, and two layers of human heart muscle cells. One ran along the robot's left side, while the other along the right. When the muscle cells on one side contracted, the tail moved in that direction. This allowed the fish to swim in the water. The opposite side's muscle cell layer similarly stretched as a result of the action. This stretching then sent a signal to the cells, causing them to contract, which kept the swimming motion going. The researchers also created an autonomous pacing node (节点), similar to a pacemaker, which controls the frequency and rhythm of these contractions.

The fish moved autonomously for over 108 days, equal to 38 million beats, the study stated. "Because heart cells constantly rebuild themselves, which takes about 20 days, the fish cells rebuild themselves about five times," says Kit Parker, a professor from Harvard University who led the research. The fish eventually reached speeds and swimming efficiency comparable to wild zebrafish.

"Though the researchers say the fish is a step forward for heart research, it could be years before it leads to the creation of an artificial heart," says Michael Schneider, a professor at Imperial College London, who wasn't involved in the study. But that doesn't dishearten Parker. "I think other methods will be faster than us," says Parker. "But in the long run, creating tissue that relies on the patient's own cells could offer unexpected benefits."

28. What does Paragraph 2 mainly tell us?
- A. Why the robotic fish was created. B. What enabled the robotic fish to swim.
C. Who got involved in the experiment. D. How fast the robotic fish could swim.
29. Which is true about the robotic fish according to Paragraph 3?
- A. They were rebuilt by human doctors. B. They didn't move as Parker expected.
C. They finally swam as fast as wild zebrafish. D. They grew into the size of wild zebrafish.
30. What does the underlined word "dishearten" mean in the last paragraph?
- A. Discourage. B. Surprise.
C. Amuse. D. Relieve.
31. What can we learn from the text?
- A. The findings may aid in heart research.
B. The first artificial hearts have been created.
C. Parker got no support from other scientists.
D. The researchers were upset about the findings.

Dealing with negative emotions can be difficult. But it's important to allow yourself to experience those emotions. Suppressing (抑制) them can cause stress. 37 For example, if you are feeling nervous, ask yourself, "What am I afraid of?" Acknowledging the issue can help you figure out how to handle it.

- Change your environment.

38 Try changing your space to make it a more calming place. For example, if your negative emotions arise from feeling out of control, try organizing your space. Clearing up the mess can make you feel on top of things.

- 39

When you know that something is causing a negative emotion, try to shift your focus away from that situation. For example, if you are stuck in a traffic jam and running late, listen to your favorite CD. Focusing on something positive can help to calm you down.

- Talk about your feelings.

Talking about your negative emotions is very productive. It is a good idea to let your loved ones know your feelings. Try saying, "I've been really stressed out lately. Do you have time to talk things through with me?"

40 It's fine to express anger or frustration, but do so without shouting.

- A. It's time to figure out what causes them.
- B. Shift your focus away from the bad thing.
- C. Be calm and reasonable while you are talking.
- D. You don't have to put too much effort into them.
- E. When you experience a negative emotion, acknowledge it.
- F. However, you will be more productive if you can handle them.
- G. Small changes can have a big impact on your emotional health.

Dear James,

Thank you for your letter. Just like you, and I also want to major in art.

Ever since I was little kid, art has been important in my life. They makes me feel great and opens my eyes to this wonderful world. I try to explore art by my own. I'm inspiring by the art works whenever I visit museums and galleries. Though I have not attended any training class designed for art learners, I've been learning from other artists and taking every chance what comes to me. I real want to make a difference in this field. It is this realization that have brought me to work harder than before to improve my knowledges and skills.

Let's fought for our dreams!

Yours,

Li Hua
