How to Effectively Prepare for the Coming College Entrance Examination

Good afternoon, teachers and students. With the College Entrance Examination around the corner, most of us feel upset and find it difficult to focus on study. Therefore it is extremely important to know how to adjust ourselves and prepare for the coming examination effectively. In my opinion, adjusting ourselves includes the following aspects.

First, Trust ourselves when we are lack of confidence. Moreover, we'd better listen to light music when feeling nervous. At last, keeping a balanced diet and doing sports also count if we don't feel well.

When it comes to our study, I think listening to the teachers attentively is an effective way. Moreover, set short term goals for our weak subjects and reward ourselves when we have achieved each one, which will make us feel motivated.

That's all. Thank you!

How to Effectively Prepare for the Coming College Entrance Examination

Good afternoon, teachers and students. With the College Entrance Examination approaching, most students feel depressed and find it tough to handle the situation. Therefore, it is extremely significant to adjust ourselves and prepare for the exam effectively.

There are many aspects for us to adjust, which cover unhealthy living habits, bad mood, inefficient studying methods, etc. It is urgent to keep a healthy lifestyle and be in good mood, because they set a good foundation for studying with efficiency.

It is also high time that we should adopt valid methods to review lessons. Consequently, I'd like to give the following suggestions. On one hand, we'd better listen to teachers attentively, which contributes to grasping key points quickly. On the other hand, we are supposed to set short term goals for weak subjects and reward ourselves while making progress so that we can be motivated constantly.

That's all. Thank you!
