### 第二节 书面表达参考范文

#### A Green Spring Festival

Have you ever heard about a Green Spring Festival? Everybody knows that the Spring Festival is an occasion of joy. However, do you know that the environment faces great challenges when it comes?

Walking along the riverside on New Year's Eve, we will find garbage caused by fireworks everywhere, and this is just a small part of the pollution caused by people's celebration. Undoubtedly, a Green Spring Festival has become a necessity. We can take action in different ways. As responsible citizens, we should take home the cardboard boxes used for containing fireworks and recycle them if possible. Besides, trying to avoid too many leftovers from reunion dinners will prevent food waste, which can also help minimize our carbon footprints. Taking public transport to visit relatives can be considered as well, which helps reduce greenhouse gases.

Let's go green in the coming Spring Festival! Let's be environmentally friendly when celebrating our reunions and passing on our traditions!
