Tolstoy, one of east Africa's few remaining Super Tusker elephants, wandered the grasslands around Mount Kilimanjaro for more than five decades. That was until last year, when he died after being speared by a farmer seeking to protect his crops.

英语·第3页(共10页)

"This is happening more and more," said ranger Daudi Ninaai from Kenya's Amboseli ecosystem reserve. The ranger fears other elephants will meet the same fate, as the increasingly frequent conflicts between humans and wildlife are worsened by the increase of new commercial farms. Incidents of elephants' crop robbing more than doubled from 156 in 2020 to 363 last year.

"It's skyrocketing because the space is shrinking," said Samuel Tokore, a senior official at Kenya Wildlife Service. The fenced farms have considerably reduced elephants' ability to travel. Tall barriers have been thrown up across their ancient migration routes.

The problem begins partly from a state-led move to divide 1.35mn acres in Amboseli used by generations of native Maasai people into private lands. After the public land was divided up, some chose to sell them on to commercial farmers.

"The destruction of wildlife buffer zones (缓冲区) and corridors for industrial farming is at a tipping point," WildlifeDirect's Kahumbu said. Michael Kairu set up his farming business in Amboseli five years ago only to find out later about the threat it posed to wildlife. His 500-acre farm is located in what was once an elephant breeding ground. "Government agencies and communities should make it clear where you can farm," said Kairu, whose customers include leading UK supermarkets. "I don't want to be in the wrong place," he said.

24. What do we know about Tolstoy?

- A. He died of old age.
B. He was killed by a gun.
C. He lived in Mount Kilimanjaro for decades.
D. He fed on farmland crops sometimes.

25. What fueled the conflicts between humans and wildlife?

- A. The carelessness of rangers. B. The rise of commercial farms.
C. The financial trouble of government. D. The unnatural deaths of elephants.

26. What does the underlined word "skyrocketing" in Paragraph 3 probably mean?

- A. Misleading. B. Suffering. C. Multiplying. D. Reducing.

27. What can be learned about Kairu from the last paragraph?

- A. He would expand the UK market.
B. He would raise money for wildlife.
C. He would close his farm in Amboseli.
D. He would set up more reserves in Amboseli.

Connecting with peers, professors, and staff members is a fundamental part of having a good college experience. But students don't always know how important those relationships are — or how to form them. A new book is here to help. *Connections Are Everything: A College Student's Guide to Relationship-Rich Education* is the follow-up to *Relationship-Rich Education: How Human Connections Drive Success in College*. The first book's authors, Peter Felten and Leo M. Lambert, have added two more for the second; Isis Artze-Vega and Oscar R. Miranda Tapia.

英语·第4页(共10页)

While professional in research, *Connections Are Everything* is accessible. It's a quick read, and its tone is friendly. Each chapter ends with a few reflection questions and a few concrete actions students can take to reach out to other people on campus. The book draws on a large body of student interviews, and it features stories from a diverse group of students attending all sorts of colleges.

Felten pointed out, many colleges do talk about connecting during orientation (入学教育), and many professors do on the first day of class. "So it's not like institutions don't do anything about this," he said. But sometimes, Felten added, those messages get lost, especially in the initial, busy adjustment to college. "A faculty member might say, 'I'm available, and I'm here to support you,' and all this, but the student is still trying to figure out how the online platform works, or whatever it is. So sometimes we do a great deal of orienting, without recognizing that these are humans we're dealing with, and they're really overwhelmed."

While the book emphasizes many people on campus can help students, it also makes clear that a college education isn't something that happens to you, but something you build. For about a decade, Artze-Vega said, there's been a lot of emphasis on how professors can better support their students in the classroom. The book, in contrast, says "it's a shared responsibility". The book encourages students "to use their agency and to take an active first step," she said. That is something Artze-Vega thinks will appeal to professors, who, after all, are tired. When students are empowered to take charge of their own education, the authors emphasized, not everything falls to faculty members. And besides, students who are empowered are simply more fun to teach.

28. What makes *Connections Are Everything* a practical book?

- A. Its authors' creativity.
- B. Its narrative writing style.
- C. Its authors' academic backgrounds.
- D. Its various student samples.

29. What does Felten think of general university orientation?

- A. Far-reaching.
- B. Ineffective.
- C. Personalized.
- D. Advanced.

30. What idea do the authors favor as for a rewarding college life?

- A. Mutual communication should be enhanced.
- B. Students' initiative also plays a key role.
- C. Interaction among peers is of more importance.
- D. Professors' guidance is a must in and out of classroom.

31. Who might find *Connections Are Everything* useful?

- A. A researcher in college.
- B. A senior in high school.
- C. A freshman in university.
- D. A teacher in kindergarten.

Tracking daily steps can motivate us to walk more. Tracking sleep can reveal sleep patterns and help improve them. Can tracking our moods make us happier?

There are now many tech ways to log your emotions each day. Fithit offers mood logging in its stress-management tool. Apps like Daylio focus on mood. The latest big player to enter the competition is Apple. Its latest software updates include a way to log your state of mind.

Why log your mood? Many mental-health professionals say simply being aware of your mental state can identify patterns and improve well-being. When people can see associations between their moods and factors like sleep and exercise, these doctors say, it can be even more powerful. Apple's push into mental health comes as the country is experiencing a youth mental-health crisis and growing numbers of adults are struggling with depression.

Then you can figure out if you feel better on days when you sleep well or exercise more. After selecting how they feel, people can then choose factors that have the biggest impact on their feelings, like travel or family. The features will be available in the Health app on iPhones and iPads. On the Apple Watch, it's in the Mindfulness app. Apple device users who track their moods will be able to share the log with their doctors. (Apple says it doesn't share Health app data with third parties without the user's permission.)

"When people keep track of emotional changes and see linkages, it can lead them to make changes in their behavior," says Michelle Craske, a psychology and psychiatry professor at UCLA who has studied the effects of mood tracking.

But some research suggests that people don't experience lasting benefits because they don't track often or long enough. "A lot of mood-tracking tools are built on the idea that people would track their mood at least once a day because they're supposed to identify patterns and triggers (诱因)," said Stephen Schueller, associate professor of psychological science at the University of California, who has studied mood-tracking apps. Schueller and his colleagues found that most people really only track their moods a couple of times a week. However, Schueller said that while there isn't enough evidence to say definitively that tracking your moods makes you happier, there aren't any downsides — except the few extra minutes a day on your phone.

32. What motivates Apple to update the mood-tracking software?

- A. The growing need for emotion regulation.
- B. The fierce tech competition.
- C. The global mental-health crisis.
- D. The professionals' advice.

33. Which measure can improve App users' mental health?

- A. Adjusting one's behavior accordingly.
- B. Sharing the record with a doctor.
- C. Monitoring one's exercise habits.
- D. Cutting down the screen time.

英语·第6页(共10页)

34. Why is Schueller uncertain about mood-tracking apps' benefits?

- A. Because users don't record long and often.
- B. Because the data can't be shared.
- C. Because extra screen time is harmful.
- D. Because the triggers are diverse.

35. What is the best title of the text?

- A. Tips on Keeping a Good Mood
- B. Keeping Track of Good Emotions
- C. Apple's Efforts to Make You Happy
- D. Tracking Moods, Beneficial or Not

Telecom fraud (电信诈骗) is the abuse of telecommunication products and services with the intention of stealing money from phone or Internet users. 36 The good news is that, in today's China, these sorts of activities are being prevented with personal awareness and governmental efforts together.

As an individual, there are some alerts to pay attention to. 37 Choosing simple passwords or "easily-guessed" usernames and passwords allows hackers to easily get into your accounts. All businesses and organizations should have a clear and strong policy for password management. This should include password changes or updates on a regular basis and creating complex combinations, using a mix of numbers, letters and other characters or symbols.

Block unknown and unwanted calls. Your personal details may be available online (e. g. on social media). 38 Don't share your credit or your online banking password. Your bank will never ask for such details. Don't transfer money to another account on their request. Your bank will never ask you to do so. If you think it's a fraud call, report it to your bank and let your phone operator know.

39 To strengthen the protection of personal privacy, the government has taken a series of measures, such as improving regulations on personal information protection and supervising the operations of apps that collect users' personal information. It is part of the efforts to prevent criminals from stealing personal information to commit fraud, said Sui Jing, an official of the Ministry of Industry and Information Technology.

To build a sound online environment, the Cyberspace Administration of China (CAC) has launched multiple channels, including the 12377 hotline and a mobile app, for netizens to report illegal and harmful online activities. 40 Nearly 19.5 million reports of illegal and harmful online content were dealt with across China in August, about 57 percent more over the same period last year, according to recent statistics released by the CAC.

英语·第7页(共10页)

- A. It has caused billions of financial losses to individuals and organizations worldwide.
- B. Beware of strangers' calls concerning personal purchases.
- C. The Chinese government is determined to address this problem, too.
- D. Don't assume a caller is genuine just because they have such details.
- E. Cyberspace is getting safer with joint efforts from netizens and authorities.
- F. Weak and lazy passwords are the most common reason for telecom fraud.
- G. China will issue severe punishment to fight the criminal chain of telecom fraud.

第二节 (满分 25 分)

阅读下面材料, 根据其内容和所给段落开头语续写两段, 使之构成一篇完整的短文。

It was a rainy night in Portland. I was waiting at the airport for my flight to New York. With several long hours before the flight, I hunted for a novel in the airport shops, bought a bag of cookies at the checkout counter and comfortably found a place to drop.

Several minutes later, I was absorbed in my book and didn't notice somebody settled beside me. I continued to read and contented myself with my chocolate-chip cookies, but at this moment, I saw that the man sitting beside me, as bold (胆大的) as he could be, grabbed a cookie or two from the bag in between! I was silently shocked and angry: "What?!" He looked decent and nothing like poor. Unbelievable as his rude act was, I tried to ignore it to avoid a scene.

So I munched the cookies and watched the clock, as the cookie thief cut down my stock. I was getting more annoyed as the minutes ticked by, thinking, "If I weren't so nice, I would blacken his eye." With each cookie I took, he took one too. The moment came when there was only one cookie left in the bag, I just glared at him and wondered what he would do. With a smile on his face, and a nervous laugh, he took the last cookie and broke it in half. He offered me half, as he ate the other. I grabbed it from him and thought: "Oh, brother! This guy has some nerve and he's also rude! He didn't even show any gratitude!"

I finally sighed with relief when my flight was called. Gathering my belongings and heading to the gate, I couldn't bear to look at the thief again! After boarding the plane and sinking in my seat, I sought my book, which was almost complete. As I reached in my baggage, I was astonished! There was my almost-full bag of cookies, in front of my eyes!

注意: 1. 续写词数应为 150 左右;

2. 请按如下格式在答题卡的相应位置作答。

"If mine are here," I cried in silent despair, "the others were his!"

When I was waiting to claim my luggage, a familiar figure caught my eye — the "cookie thief"!
