六、短文改错:

It has 添加 been proved by scientists using hidden cameras that when only one or two people ride in a lift, they usually lean against on(删去 on) the walls. If four people are aboard, they usually moved(move) towards the four corners. So (However), when the population reaches five and(or) six people, everyone begins to obey more formal rules of lift etiquette. They all turn to face the door. "They get taller and thin(thinner)," as a professor describes it. "Hand(Hands) and purses hang down in front of their bodies. They mustn't touch each other in any way if(unless) the lift is crowded and then only lightly at the shoulder or the upper arm. Also there are(is) a behavior to look upward at the floor indicator. If they speak, it is definitely in the (a) low voice."

七、参考范文:

With the development of science and technology, some students are paying less attention to their handwriting. Recently, our school English newspaper has made a survey about the reasons why some students don't want to improve their handwriting.

According to the survey, about 51 percent of the students argue that they can turn to computers for help. Around 21% believe it's convenient to input words through the voice with the help of some Apps. About 23% think that they are so busy with the study that they have no time to practice. And the rest hold that practising handwriting is useless.

Just as the saying goes, writing style shows the man. Bad handwriting will definitely ruin our image. Therefore, in my opinion, more emphasis should be placed on it in future.

So measures should be taken to improve our handwriting. For example, we can start handwriting competitions to make students aware of the importance of it. What's more, teachers can give students some tips about how to write well.
